

### Price Disclosure Cycles Table

The Cycles Table below sets out the first price disclosure cycle and relevant dates for brands with a drug/MoA joining price disclosure in the month in the first column of the table (usually the day a drug moves to F2). The months when most drug/MoAs will join price disclosure are highlighted (April, August and December each year).

Cycles are named by reference to their intended reduction day. Any brand containing a drug/MoA that is already in a cycle will join that cycle, and so may disclose data for less than the full data collection period. Details of the drug/MoAs in price disclosure are available on the [price disclosure \(SPD\) web page](#).

After their first data collection period the brands of each drug/MoA will continue to submit data after every six monthly data collection period ending 31 March (data due by 12 May) and 30 September (data due by 11 November) each year. They are then subject to potential reduction days on 1 April and 1 October each year. Outcomes for each cycle are intended to be announced in mid to late December (for April reduction day) and in mid to late June (for October reduction day).
