

Originator list for PBS medicines on F2 formulary – stakeholder consultation

For new subsection 99ADB(6B) of the Act, the brands appearing in column 2 against a drug in column 1 are being nominated as potential originator brands of pharmaceutical items with the same subsection 85(2) drug.

Unless an 85(5) manner of administration is specified in column 3 for an originator brand, the originator brand would apply for any manner of administration of a drug.

Unless an 85(3) form is specified in column 4 for an originator brand, the originator brand would apply for any form of a drug with the same manner of administration.

For a drug where no originator brand applies, that is indicated in column 5 with a reason.
