

My mum suffers from Alzheimers and this drug has helped greatly in slowing the disease with her, if you take it off the PBS she will not be able to afford to continue with this medication. Please please I implore you dont take the precious moments we have left with our mum away from us by taking this off the PBS.... she is our life & it is hard enough watching her slip away and without this drug we will loose her so much faster, so please help us keep her with us for as long as possible  
thankyou a loving daughter who is desperate to keep her mum with her for as long as possible.
