

To the Review Committee

Sirs,

I have several patients who are receiving supply of Pradaxa outside PBS.

1. They are anxious that supply may be discontinued.
2. They are not keen to revert to warfarin due to warfarin's restriction with diet, requirement for blood testing and medication interaction.

I also have other patients who would benefit with pradaxa and I have not informed them of this as I have used up my quota of patients allowed by Boehringer.

My plea for expedient listing of pradaxa for all patients with AF

Sincerely,

I.S.Motala
