

Dear Sirs

My 17 year old son has been using an insulin pump for almost a year and the difference is amazing.

\*\*\*\*\* has had type 1 diabetes for 6 years and firstly used syringes, then pens. He has so much more freedom with the pump and the fact he wears it constantly does not faze him. It is much less of a worry for the family as he has better control of his sugar levels.

We obtained part payment at the time which was a huge help as we couldn't have otherwise afforded it. I just hope that when it packs up, we may get a little help again.

Your sincerely

\*\*\*\*\*
